

Appendix 6: Study Record Review Checklist

Work Instruction Title: Management of Monitoring Visits and Sponsor Audits	WI Number_Version: WI-CIM-CR003_01
--	--

Instructions: This checklist will be used for the review of study records. Any issues identified and their resolutions should be documented in the "Comments" column. Include sufficient details to allow anyone to understand the issue and resolution, including but not limited to, the individual who identified the issue and date when it was noted, the individual assigned to resolve the issue and date they were informed, the individual and date when the issue was resolved and how it was resolved, references to any documents or other pertinent information to allow follow-up if necessary.

Item	Criteria	YES √	NO √	N/A √	Comments / Issues Identified
1. Informed Consent Process and Documentation <i>(Initial and re-consent)</i>	Current, approved version(s) of the consent form have been signed and dated in ink by the research participant or legally authorized representative and, if required, appropriate site staff or witness.				
	Documentation in subject's record or medical chart regarding the process of informed consent is present (e.g., informed consent process checklist), including: the participant and/or legally authorized representative received a full explanation of the study, and adequate time was given for consideration and questions regarding study participation.				
	The participant and/or legally authorized representative signed and dated the consent form, prior to initiation of study-specific procedures.				
2. Eligibility Criteria	The participant has met all Inclusion criteria and none of the exclusion criteria.				
	A chart note or eligibility checklist addressing each specific criterion been completed.				

Appendix 6: Study Record Review Checklist

--	--

Item	Criteria	YES √	NO √	N/A √	Comments / Issues Identified
	The checklist has been signed and dated by the Investigator responsible for assessing eligibility for enrollment of the study subject.				
3. Ongoing Eligibility	The subject has not met any discontinuation criteria and remains eligible for participation.				
4. Prohibited/ Concomitant Medications	Recording of prohibited/concomitant medications is consistent and complete between source documentation and Case Report Forms (CRF/eCRF).				
	Protocol prohibited medications are found in source documentation/eCRF. If yes, confirm with protocol and eligibility.				
5. Investigational Product Administration	Study investigational product has been administered per protocol and documented accordingly. Note: This includes a review of the pharmacy documentation including but not limited to labeling, chain of custody, proper storage, training and licensing of personnel, and blinded/unblinded handling, and administration.

--	--

Item	Criteria	YES √	NO √	N/A √	Comments / Issues Identified
6. AE/SAE Identification and Reporting	AEs and SAEs have been identified, recorded, and reported properly and within the specified timelines in protocol. If timeline not specified in protocol, AEs must be documented upon notification from the research participant and must be evaluated by the investigator as soon as possible.				
7. Missed Visits and Follow-up	The participant has missed one or more study visits.				
	If yes, missed visits are documented according to protocol and SOP requirements. Documentation of attempts to contact the participant is present (i.e., phone call, email, etc.) If missed visits resulted in a protocol deviation, they have been recorded as protocol deviations and reported to the sponsor and REB in a timely manner.				
8. Missed Lab Tests/Procedures	All protocol-required lab tests and procedures have been performed.				
	If no, missed tests/procedures have been reported as protocol deviations in a timely manner.				
	Laboratory results filed for each visit and signed by investigator in a timely manner.				
9. Investigational Product / Study Discontinuation	If the participant has discontinued the investigational product or study visits, all protocol-required steps have been followed. The discontinuation has been documented appropriately.

Item	Criteria	YES √	NO √	N/A √	Comments / Issues Identified
10. Delegation Log	Personnel involved in the conduct of the study are listed on the log and their training record is complete based on the dates of their involvement.				
11. ISF	The ISF has been filed appropriately and contains all the necessary records to date, including correspondence.				
12. Miscellaneous	Good Documentation Practices have been followed (i.e., ALCOA principles).				
	All entries are signed and dated.				
	Signatures of personnel signing are present on the delegation log.				
	Error corrections are properly executed (i.e., reason for correction included, correction done by individual who recorded the initial entry or the individual making the correction referenced the source for the change).				
	The Investigator has had oversight throughout the study (e.g., has reviewed and signed records in a timely manner).				
	Only REB-approved documents were used following approval to implement by the sponsor (e.g., protocol amendment, consent form revisions).
